Go to Solution Explorer and note the existing references
Enter at PM> Install-Package PayPal_AdaptiveAccounts_SDK
*On enter key-press, the output window should display:*

```
Attempting to resolve dependency 'PayPal_Core_SDK'.
Attempting to resolve dependency 'log4net (≥ 1.2.10)'.
Successfully installed 'log4net 1.2.10'.
You are downloading PayPal_Core_SDK from PayPal, the license agreement to which is available
at https://github.com/paypal/sdk-core-dotnet/blob/master/LICENSE.txt. Check the package for
additional dependencies, which may come with their own license agreement(s). Your use of the
package and dependencies constitutes your acceptance of their license agreements. If you do
not accept the license agreement(s), then delete the relevant components from your device.
Successfully installed 'PayPal_Core_SDK 1.0.0'.
You are downloading PayPal_AdaptiveAccounts_SDK from PayPal Developer Tools Team, the license
agreement to which is available at https://github.com/paypal/adaptiveaccounts-sdk-
dotnet/blob/master/LICENSE.txt. Check the package for additional dependencies, which may come
with their own license agreement(s). Your use of the package and dependencies constitutes your
acceptance of their license agreements. If you do not accept the license agreement(s), then
delete the relevant components from your device.
Successfully installed 'PayPal_AdaptiveAccounts_SDK 2.1.96'.
Successfully added 'log4net 1.2.10' to AdaptiveAccountsSampleApp.
Successfully added 'PayPal_Core_SDK 1.0.0' to AdaptiveAccountsSampleApp.
Successfully added 'PayPal_AdaptiveAccounts_SDK 2.1.96' to AdaptiveAccountsSampleApp.
```

After successful installation, note that the new references get added automatically

Also, go to Menu ➡ Tools ➡ Library Package Manager, *select* Manage NuGet Packages for Solution…

On Manage NuGet Packages*, search for* 'PayPal_AdaptiveAccounts_SDK' *to get the details*
